Eighth Annual Advanced Workshop on Gynecologic Laparoscopic Anatomy & Minimally Invasive Surgery Including TVT and TOT

Resad P. Pasic, M.D., Ph.D.
Scientific Program Chair

May 19-20, 2006

University of Louisville
Louisville, Kentucky

Educational Grants:
This workshop is supported in part by educational grants from Ethicon EndoSurgery, Inc., Gynecare Worldwide, A Division of Ethicon, Inc. A Johnson & Johnson Co. Gyrus ACMI in accordance with the ACCME guidelines for commercial support.
OVERVIEW

This postgraduate workshop has been designed for gynecologists with advanced laparoscopic skills who desire to master retroperitoneal and Space of Retzius anatomy and the various surgeries performed therein, including the performance of TVT/TOT surgery and cystoscopy.

These goals are achieved using unembalmed female cadavers in an extensive two-day course of lectures and hands on laparoscopic experience. No more than four participants are assigned to each cadaver and are closely supervised by experienced faculty instructors, including some of the most outstanding physicians in this field. The faculty members are selected based on surgical experience as well as expertise in teaching in this setting.

During each hour of hands on experience with the cadaver, each participant will operate, assist and observe. With this rotational format, participants learn pelvic anatomy and laparoscopic suturing skills in a meaningful manner. Faculty members will lead participants through procedures such as pelvic sidewall dissection, preparation for laparoscopic hysterectomy, uterosacral coloposuspension, Burch retropubic coloposuspension, and paravaginal defect repairs through the laparoscopic approach.

Breakout sessions will highlight the use of TVT/TOT while a separate group works with instructors in laparoscopic suturing. This workshop is limited to 28 participants, so we encourage you to register today. This is the 8th annual course held at the University of Louisville and it has been highly acclaimed by attendees from around the world.

OBJECTIVES

After completion of this two-day course of lectures and hands on dissection of human, fresh frozen cadavers, the participants will:

- Increase their applied knowledge of female pelvic anatomy.
- Improve their surgical skills through hands on dissection of retroperitoneal spaces and pelvic sidewall.
- Improve their anatomic knowledge and laparoscopic skills in performing advanced operative laparoscopic procedures.
- Reinforce their laparoscopic suturing skills and learn new ones.
- Learn how to perform cystoscopy and the TVT/TOT procedure.
